Ref.: NOA/M&R/26-27/005

Date: 21.06.2026

To
Director (HR),
NALCO, Bhubaneswar.

Subject: Urgent Representation Regarding Serious Security Lapses in M&R Township and Immediate Corrective Measures.

Respected Sir,

The issue of security lapses in the M&R Township has become a matter of serious concern and has repeatedly been raised at various forums, including Complex Level Meetings and Apex Level Meetings. Despite repeated representations, the security situation continues to deteriorate.

Several security-related incidents have already been brought to the notice of the local management through our earlier communication (Letter No. **NOA/M&R/25-26/11 dated 03.12.2025**). Unfortunately, adequate preventive measures have not been taken, resulting in increasing concern among township residents.

One of the major contributing factors is the accommodation of project labourers within the residential township. The presence of a large number of contract labourers in residential areas has significantly aggravated the security concerns. Incidents of labourers roaming through residential colonies in an intoxicated state and in an indecent manner have become increasingly common, causing discomfort and insecurity, particularly for women, children and senior citizens.

The recent incident on 18.06.2026, wherein a woman was allegedly molested near NALCO Hospital by an unidentified person, is deeply disturbing and wholly unacceptable. The incident has created a sense of fear and insecurity among the residents, particularly women, who play an indispensable role in supporting the employee workforce and maintaining the social fabric of the township. Such an atmosphere of insecurity inevitably affects the mental well-being of employees and their families, which in turn can have an adverse impact on morale, productivity, and organizational performance. This unfortunate incident raises serious concerns regarding the effectiveness of the existing security arrangements, especially when nearly ₹8 crore was reportedly spent on township security during the financial year 2025–26.

The Officers' Association had earlier cautioned that failure to implement timely preventive measures could lead to more serious incidents in the future. Regrettably, those apprehensions have now been materialized. If immediate corrective action is still not taken, the possibility of even

more unfortunate incidents involving women or children cannot be ruled out. The safety and security of employees and their families must remain the highest priority. Organizational achievements, production targets and project milestones lose their significance if the township itself cannot provide a safe and secure environment for its employees.

In view of the above, the following measures are strongly recommended for immediate implementation:

1. **Immediate removal of all project labourers residing inside the residential township** and provision of separate temporary accommodation outside the township.
2. **Strengthening of CCTV surveillance** by increasing coverage, installing high-resolution cameras, eliminating blind spots, and improving street lighting throughout the township.
3. **Constitution of a Township Security Committee** comprising representatives from the Security Department, HR Department, Project Department, Officers' Association and Ladies' Club to periodically review security arrangements and recommend improvements.
4. **Establishment of a dedicated Women and Child Security Helpline** for immediate reporting and response to emergencies within the township.
5. **Deployment of CISF personnel at identified vulnerable and sensitive locations** to enhance security and deterrence.
6. **Immediate deployment of a mobile security patrolling vehicle, supported by local police wherever required, for continuous patrolling during evening and night hours** until a comprehensive security system is put in place. The movement of the patrolling vehicle through all residential sectors at regular intervals will act as an effective deterrent against anti-social activities and enhance the sense of safety among township residents.
7. **Review of the existing security manpower deployment**, presently around 55–60 security personnel per shift, to assess its adequacy considering the township's size and security requirements.
8. **Comprehensive verification of all contractors and contract workers** residing or working within the township, along with strict access control and identity verification.
9. **Repair and proper maintenance of the peripheral road** and issuance of necessary instructions to external commuters and contractors to use the peripheral road instead of passing through the residential township.
10. **Implementation of a digital incident reporting system**, such as a QR code-based platform or mobile application, enabling residents to report security-related issues promptly for timely action and monitoring.
11. **Identification and closure of all vulnerable openings along the township boundary wall** to prevent unauthorized entry into the residential area.

The Officers' Association requests your kind intervention to address this issue on priority. The recent incident should be treated as a wake-up call to strengthen the township's security framework before any further untoward incident occurs. A safe township is not merely an administrative requirement—it is a fundamental responsibility towards every employee and their family.

We sincerely hope that immediate and decisive action will be taken in the larger interest of the NALCO community.

Thanking you.

Yours sincerely,

Ranajit Nayak

General Secretary

**Subject: Concerning Rise in Antisocial and borderline criminal Activities in Township –
Need for Immediate Intervention**

Dear Sir,

This is to bring to your urgent attention the increasing number of **antisocial and borderline criminal activities** occurring within the Township, which have raised serious safety concerns among employees and their families. Over the past few weeks, several incidents have been informally communicated by employees to association members, and the situation now warrants immediate organizational intervention.

- Rising Instances of Harassment of Women and Children:**
Multiple employees have independently reported incidents of harassment directed towards women and children by miscreants in different parts of the Township. These occurrences are causing significant distress and fear within the community.
- Unauthorized Gathering of Non-NALCO Individuals Near Residential Areas:**
There has been a noticeable increase in the presence of non-NALCO individuals loitering near quarters, especially during late evenings and nighttime. Their presence is creating a strong sense of insecurity, particularly among women and children, who now hesitate to move freely within the Township.
- Rising incident of theft inside township.**
A recent incident was reported at Quarter No. B-1/Sec-3, where a child's bicycle and an induction stove were stolen. Similarly, in Quarter No C-99 Sec-3, a bicycle was stolen recently.
- Serious Criminal Incident Near Medical Line (Quarter No. B-13):**
A particularly alarming incident occurred yesterday near the Medical Line quarters. At **Quarter No. B-13**, a group of two to four young boys along with a local agent attempted to bring a girl for the purpose of immoral activity involving contractual occupant of the said quarter. This act was **intercepted and prevented by three NALCO employees**, following which security and HRD personnel intervened.

Upon preliminary questioning by the employees and security staff, it was discovered that **approximately eight non-employees are staying illegally in Quarter No. B-35**, and a similar number appear to be occupying **Quarter No. B-49, B-142, B-33, B-34 (All Sec-3)** without any allotment order or valid gate pass.

In addition, such unauthorized occupants frequently engage in late-night drinking, playing loud music, and passing inappropriate comments at women and children passing through the area. These behaviour are not only unacceptable but deeply threatening to the well-being of Township residents.

One of our employees who helped prevent the above incident has even been **threatened** by these individuals, which further highlights the seriousness of the situation.

These are some incidents which are known to association members, there might be more such cases which we are oblivious of but is happening without our collective knowledge.

Sir, these developments have created a pervasive sense of fear across the Township, especially among women and children. As members of the NALCO community, we collectively feel the need for a prompt and strong response to ensure safety, restore confidence, and prevent such incidents from recurring.

We therefore request your kind intervention to :

- Take immediate action against the resident of quarter no-B-13 Sec-3, related to incident occurred on 02.12.2025.
- Contractual workmen of any establishment must not be allocated quarter inside township and that too around family quarters like medical line of Sec-3 and such locations.
- Cancel all such allotments made till now and vacant such quarters.
- Conduct an **immediate verification** of unauthorized occupants in the identified quarters in and around medical line of Sec-3.
- Strengthen **security patrolling**, particularly during evening and night hours.
- Initiate **strict action** against individuals involved in illegal occupancy or criminal behaviour.
- Implement measures such as placement of security personnel to maximum locations to ensure the **safety of women, children, and residents** within the Township.
- Until these actions are taken, officers association may be given a copy of the allotment of all the quarters made for non-Nalco employees.
